Processing and fabrication of POMPEII QUARTZ such as cutting, polishing, drilling, grinding, etc., must be carried out using water spraying tools.

Use vacuum cleaners or damp cloths for cleaning. DO NOT use dry sweeping, dry brushing or compressed air to clean.

Use local exhaust ventilation (LEV) systems to capture silica dust and prevent dust from escaping.

Even when equipped with water integration, manual saws are less recommended for cutting initial stone slabs

Use earplugs to reduce noise when processing products.
